

MVTP-Audio

Quick Start Guide

December 2019

1. Turn the MVTP-Audio device on.
2. Connect the MVTP-Audio device as shown in the following figure. Use SDI / HDMI adapters where appropriate for video inputs and outputs.
3. Check that LEDs for connected inputs are on.
4. Use front panel buttons and display on Page 2 to set the Streaming IP configuration.
5. Use front panel buttons and display on Page 1 to set streaming to AUTO or YES.
6. Check that the destination is UP and TX and RX bitrates are as expected.
7. Check on the front panel display on Page 4 that the input and output video format is as expected.
