## NDI®|HX Capability for GY-HC500 Series Camcorders

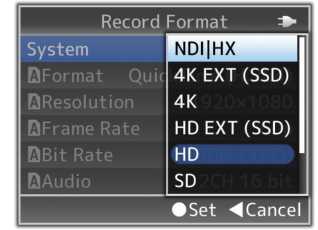

The NDI®|HX mode modification adds the capability for the GY-HC500, GY-HC550, and GY-HC550ESBN to become a live video source for NDI®|HX compatible hardware or software connected to the local area network (LAN).

Features available in the NDI®|HX mode include automatic camera discovery on the LAN by supported hardware and software, tally support, and IP remote control capability.

**CONNECTED CAM™**

# NDI®|HX Mode Selection

The NDI®|HX live video source capability is a mode of operation in addition to the camcorder's existing output formats. The modification adds the NDI®|HX mode to the Recording Format System selection of the camcorder. Selecting NDI®|HX sets the camera to operate solely as a live video source.

## Modification for Current GY-HC500 Series

Current owners of the GY-HC500, GY-HC550, and GY-HC550ESBN will be able to have their camcorders modified to incorporate the new NDI®|HX features through JVC. Please contact JVCKENWOOD Europe.

### System

### NDI®|HX Streaming mode

Resolution	1920x1080, 1280x720	Bit Rate	1920x1080: 20M/16M/12M 1280x720: 16M/12M/8M
