1 Device and Tool Preparation

1.1 Please prepare following devices and tools before FW upgrade.

Connections and get IP address (skip the step If you know the IP of your camera.)
 2.1 Connect camera to network

- 2.2 Download VMS5.0 software from Lumens website and install it.
- 2.3 Launch VMS software and click "Discovery Device IP" button to get the camera IP address. (Only can search the device of the same network.)
